Agrometeorological Advisory

Crop	Stage	Advisory
Cucumber	Fruiting	Mulching may be practiced. Collection and destruction of fruit fly affected fruits need to be done.
Green manuring crop	Sowing	Sowing of green manuring crop like cluster bean, dhaincha etc may be advised where harvesting of rabi crop is over. Ensure proper moisture for proper germination and growth of crop.
Mango	Fruit setting	In mango orchard, to prevent shedding of new fruits due to high temperature apply irrigation and spray NAA@ 5ml/10 lt. of water.
Onion, Garlic & Tomato	Harvesting	Farmers are advised to give light irrigation in the mature onion and garlic crops one week before digging. Keeping in view of forecasted high temperature, farmers are advised for harvesting of mature vegetables at morning and evening.
Jute	Seed-sowing & Seedling	Treat the seeds with carbendizm 50WP @ 1g/kg of seed before sowing. Apply Trichoderma viride mixing with organic manure @ 5g/kg of organic manure in field soil. In case of rotting of seedlings i.e.seedling blight apply carbendazim 50 WP @1g/lit. of water or Cu-hydroxide 75 WP@ 2g/lit.of water.
