RH is expected to be 78% to 81%. Maximum temperature is expected to be around 35.0-37.0 deg C and minimum temperature is expected to be around 28.0-29.0 deg C.

### General Advisory:

After harvesting of rabi crops farmers are advised to test their soil from certified sources or university and enhance soil health.

### SMS Advisory:

After harvesting of rabi crops farmers are advised to test their soil from certified sources or university and enhance soil health.

### Crop Specific Advisory:

| Crop(Varieties) | Crop Specific Advisory  |
|-----------------|---|
| RICE            | Start harvesting of 80% matured grains and stored it in a safe place. Don't burn the stubbles after harvesting. It creates air pollution and also deteriorates soil health. Mix it with soil for next crop for better soil health and productivity. |

### Fisheries Specific Advisory:

| <b>Fisheries(Varieties)</b> | <b>Fisheries Specific Advisory</b>  |
|-----------------------------|---|
| COMMON RIVER FISH           | Drain out excess water and keep clean pond water. Use Terramycin tablets to control bacterial diseases. |
