As per Extended Range Forecast System New Alluvial Zone of W.B. will experience normal rainfall in the coming week and as per Standard Precipitation Index this zone experienced moderately dry condition

### Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
SOYABEAN	During this weather Kharif Soyabean may be sown in the medium and high land of this zone. Before sowing seeds should be treated with carbendazim or thiram or with trichoderma viride or pseudomonas fluorescens . Half of N, full P & K may be applied as basal and remaining half may be topdressed thirty days after planting. Weeds should be properly controlled before planting.
JUTE	Retting : Crijaf- Sona 30 kg per ha or Nimphet Sathi 45 kg per ha may be applied to the pond water at the time of retting .This may reduce the time of retting and improve the quality of fibre . Retting tme : 10-12 days. Don't use Banana tree parts in this process , Use 2-4 Dhaincha plants per bundle of Jute .
