Spraying , fertilizer application and harvesting may be done because no rainfall is expected in the coming week .

SMS Advisory:

Spraying , fertilizer application and harvesting may be done because no rainfall is expected in the coming week .

Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	Farmers are advised for, not to burn the residue of kharif crops (paddy) in the fields because it not only pollute the environment but also causes the severe health (respiratory) problems. The smog formed due to burning of residue reduces the solar-radiations received to the crops and decrease the process of photosynthesis and evapotranspiration, which affect the quality and quantity of all crops. Farmers are advised to mix the residue of kharif crops in the soil. It increases the soil fertility. It can be used as mulching for decreasing soil evaporation and to conserve soil moisture. Pusa decomposer capsule can be used @ 4 capsule /ha for decomposing the residue of the paddy.

Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
-------------------------	--------------------------------

Horticulture(Varieties)	Horticulture Specific Advisory
CABBAGE	Present weather is suitable for sowing of winter cabbage, cauliflower, tomato, chilly and brinjal . Prepare the land thoroughly . Make the land loose and friable before sowing seed .
