Based on MME forecast Tmax will be below normal in Week 1 and 2. and for Tmin, it will show below normal in Week 1 and week 2. To know the nowcast weather forecast for thunderstorm follow WhatsAppmessesges

### SMS Advisory:

As above normal rainfall is predicted and there is a chance of thunderstorm for next 2 days complete harvesting of sunflower, tightening betel vine garden and keep the cattle under shade.

### Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	Boro paddy Grain filling stage • Bacterial leaf blight • For bacterial leaf blight attack spray Azithromycin 1.5ml per liter of water after 2 days as rainfall is predicted in next two days. • Where 80% grain found prepare for harvesting and start harvest after two days.
CUCUMBER	Summer cucurbits Fruiting • Damage due to hailstorm and rainfall • Fungal attack may take place after rain • Harvest mostly mature cucurbits as much as possible. • Arrange proper weed free drainage system. • For preventing fungal attack apply SAF or Diethane M-45 @2.5ml per liter of water during clear weather after removal of excess rain water.

<b>Crop(Varieties)</b>	<b>Crop Specific Advisory</b>
GREEN GRAM	Green gram Flowering stage • Apply 2% DAP for better flowering
