RH is expected to be 74% to 79%.Maximum temperature is expected to be around 33.0-34.0 deg C and minimum temperature is expected to be around 25.0 - 26.0 deg C.

### General Advisory:

Farmers are advised to make proper drainage channels in the field to avoid crop damage due to excess water accumulation.

### SMS Advisory:

Drain the excess water immediately.

### Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	At this time rice crop is at tillering to panicle initiation stage. In the recent cloudy & humid weather condition, farmers are advised to monitor crop regularly and take appropriate plant protection measures depending on the situation .

### Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
BROCCOLI	Farmers may prepare land for Broccoli this time because this vegetable is rich in Vitamin A, C and mineral Magnesium, Iron and Calcium. It requires less fertilizer, less susceptible to attack of pest and disease and gives more profit. Fertile loam or sandy loam and medium to high land with pH 6 to 7 are required. Collect seed from any certified source and prepare seed bed. Main field may be prepared with 12 to 15 ton Cowdung per hect. land. Single row planting may be done. Transplanting may

<b>Horticulture(Varieties)</b>	<b>Horticulture Specific Advisory</b>
	be done at plant age 4 to 6 weeks. 400 to 500 gm seed required for one hect. planting. Seed may be sown at 0.5 inch depth and spacing should be min. 12 inch.
